

Using ScaffoldMessenger for SnackBar

If you're working with Flutter 2 or higher, you might see a deprecation warning regarding the `hideCurrentSnackBar()` and `showSnackBar()` methods.

You can get rid of them by using:

```
ScaffoldMessenger.of(context).hideCurrentSnackBar()  
ScaffoldMessenger.of(context).showSnackBar(...)
```

instead of

```
Scaffold.of(context).hideCurrentSnackBar()  
Scaffold.of(context).showSnackBar(...)
```
